3618

**Period for Reply** -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

### **DETAILED ACTION**

Claims 13 – 24 have been examined. Claims 1 – 12 have been canceled by Applicant.

### ***Drawings***

The drawings are objected to because the item and figure numbers are non-uniform and difficult to discern and the detail of figure 3 is obscured by the shading of the figure. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Objections***

Claim13 objected to because of the following informalities: the inclusion of bullets, i.e. "-" within the claim is inappropriate and unnecessary. Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 17 – 19 and 23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 17 recites the limitation "the rear end" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim 23 recites the limitation "the resilient element being removable if required." The inclusion of the words "if required" renders phrase the non-limiting.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13 – 15, 17 – 21 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Loughney (4,322,090). Loughney discloses a ski mountaineering binding comprising:

- a front retaining element, i.e. toe bail, operatively associated with a front end of a sole (Fig. 1, item 80);
- a rear retaining element formed to engage a heel of a sole (Fig. 1, item 104);
- a spring biasing device between said front and said rear retaining elements (Fig. 1, item 113);
- said spring biasing device being pre-biased in a forward position (Figs. 1 and 4);
- said spring biasing device allowing said rear retaining member to be longitudinally displaceable (Figs. 4 and 5);
- said front and said rear retaining elements being rotatable about an axis which extends transversely to the longitudinal direction of said binding (Fig. 1, item 78);
- a connecting member, i.e. flexurally resilient plate pivotally mounted about said axis (Figs. 2 and 6, item 28);
- said spring biasing device being arranged on said connecting member (Fig. 2);

- an opening mechanism whereby said rear retaining element is movable against the action of said spring biasing device into an open position (Figs. 4 and 5, item 106);
- a retaining cable (Fig. 1, item 112).

### ***Allowable Subject Matter***

Claims 16, 22 and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 23 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- Parish (2,094,667) discloses a separable ski binder;
- Bailey (4,887,833) discloses a touring ski binding;
- Riedel et al. (7,207,591) disclose a ski binding;
- Riedel et al. (7,264,263) disclose a ski binding.
